Se realizará rescate y relocalización para el grupo de los anfibios en todas las obras proyectadas, tanto areales como lineales, dado que la medida de perturbación controlada no es eficaz en este grupo.

Se realizará rescate y relocalización para salamanqueja del norte chico (*Garthia gaudichaudii*) en todas las obras proyectadas, tanto areales como lineales, dado que la medida de perturbación controlada no es eficaz para esta especie.

El rescate y relocalización se realizará para todas las especies de baja movilidad (reptiles, anfibios y micromamíferos) en todas las obras areales del proyecto, superiores a las 5 hectáreas, debido a que la perturbación controlada no es eficaz en superficies mayores a éstas.

No se realizará rescate y relocalización en las obras lineales, tales como los accesos proyectados y/o servidumbre, así como el área que ocupan las torres en las respectivas servidumbres. Lo anterior, en vista a que la medida de perturbación controlada se considera eficaz.

3. Se autoriza el marcaje de los reptiles y micromamíferos con pintura acrílicas no tóxicas.

   Los ejemplares capturados, una vez identificados y marcados, deberán ser liberados en los sitios conformados por las coordenadas que se indican en el Cuadro N° 6, ubicados en las Regiones de Coquimbo, Valparaíso y Metropolitana. El traslado de los ejemplares se hará en contenedores plásticos individuales adaptado para cada especie, con la excepción de la especie de reptil *Liolaemus tenuis, que* se trasladará todos los miembros de un grupo familiar en un mismo contenedor.
